

## PEGASUS DATAWORKS

A VIRTUAL NETWORK

HELPLINE NUMBER: 7278979301 (SMS support,  
for registered agents only)

EMAIL SUPPORT: [pegasus.dataworks@yahoo.com](mailto:pegasus.dataworks@yahoo.com)

---

### JOB DESCRIPTION:

Simply put, you are supposed to type in captchas in a software. The software will be provided to you along with an unique user ID and password. You should solve and enter each captchas within 15 seconds after it appears on the screen. Not being able to solve and enter a captcha within 15 seconds of its appearance will result in a kickout from the server. Multiple kickouts will result in an eventual ban. Bans can be temporary or permanent depending on the frequency of kickouts. For this job, you need a good internet connection. Please don't run any bandwidth-hogging application like torrent client or downloader like IDM or FlashGet while solving captchas as this will result in delay of arrival of captchas on your screen. Detailed procedure of entering captchas will be provided once you are registered as Qlink Agent. For further enquiries, kindly drop a sms to our Helpline Number or send an email to the email support.
